

Isaac Armstrong

Black Star Project Advisor

"I am so excited to be part of this project because as a young African who was raised in Ghana and now a resident in the United States, I understand the complexities of the struggles young Black men face in pursuit of excellence in society. I believe that if we help nurture these brilliant young men to understand their history, culture, and potential, we will be creating a new generation of Black men who will change the gory narrative to that of glory. Ghana is the ancestral home of most enslaved Africans, and I hope that making this journey with these young men will help reignite a sense of belonging, self-value, and confidence in themselves as a special breed of men who can do great exploits."

Isaac Armstrong is a certified Information Professional who has served in the oil and gas and biotechnology industries for about 14 years. He is currently for Vaxcyte, a pneumonia vaccine manufacturing company based in California. He has a postgraduate degree in Information Science and a postgraduate diploma in Business Analytics from Harvard Business School.

He is originally from Ghana but relocated to the United States in 2019. He is the founder of Rural Health Foundation, a nonprofit organization based in Portland, Oregon. Their mission is to help provide access to quality healthcare for people living in low-income communities using modern point-of-care ultrasound technologies and telemedicine App to do rapid assessments, diagnosis, and treatment of conditions that would otherwise go undetected and eventually cause death. He has developed a telemedicine App called HomDoc to help achieve this goal.

Isaac is also the Founder and C.E.O of eCourseMate, a social networking and learning platform developed to help students from around the world to connect and help each other through their academic journeys.
